

Parallel Problem Solving from Nature - Ppsn VII: 7th International Conference, Granada, Spain, September 7-11, 2002, Proceedings

By -

Springer. Paperback. Condition: New. 954 pages. Dimensions: 8.8in. x 6.2in. x 1.5in. We are proud to introduce the proceedings of the Seventh International Conference on Parallel Problem Solving from Nature, PPSN VII, held in Granada, Spain, on 7-11 September 2002. PPSN VII was organized back-to-back with the Foundations of Genetic Algorithms (FOGA) conference, which took place in Torremolinos, Malaga, Spain, in the preceding week.

The PPSN series of conferences started in Dortmund, Germany 1. From that pioneering meeting, the event has been held biennially, in Brussels, Belgium 2, Jerusalem, Israel 3, Berlin, Germany 4, Amsterdam, The Netherlands 5, and Paris, France 6. During the Paris conference, several bids to host PPSN 2002 were put forward; it was decided that the conference would be held in Granada with Juan J. Merelo Guervós as General Chairman. The scientific content of the PPSN conference focuses on problem-solving paradigms gleaned from natural models, with an obvious emphasis on those that display an innate parallelism, such as evolutionary algorithms and ant-colony optimization algorithms. The majority of the papers, however, concentrate on evolutionary and hybrid algorithms, as is shown in the contents of this book and its predecessors.

This edition of the conference proceedings has a large section on applications, both to classical problems and to real-world engineering problems, which shows how bio-inspired algorithms are extending their use in the realms of business...

This ebook can be worthy of a go through, and a lot better than other. Better then never, though i am quite late in start reading this one. Its been printed in an exceedingly easy way which is just soon after i finished reading this book where basically modified me, affect the way i really believe.
