

Judging Whether Technological Innovation: Can Cause One Factor of Production (Paperback)

By Johnny C. H. Lok

Createspace Independent Pub, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This book uses a descriptive methodology of system analysis to show that technology is needed on economic progress, and that innovation can raise efficiency and more productivity. Economies, far from being in equilibrium ,in fact evolve through the continual differentiation of products and proceses or change of scope. The only solution for raising productivity and efficiency, who are losing out in the race is investment in all its forms, in both equipment and people. This analysis will be of interest to all those faced with economic decisions: engineers, managers, scientists and administrators as well as economists need to learn how to use technology to solve low efficiency and low productivity challenges. This is a book for those who, as economists by training who doubt the current efficacy of the solutions which whose discipline traditionally prescribes, as economic dominance begins to move with the technology to parts of the world that only a short time ago were considered less developed . This book presents an analysis of economic processes which does not require hypotheses. It shows how economies evolve through the deliberate action...

Reviews

The book is great and fantastic. Better then never, though i am quite late in start reading this one. I realized this publication from my dad and i advised this ebook to find out.

-- **Dr. Blair Mann**

Complete information! Its such a great study. It is probably the most amazing book i have got study. Once you begin to read the book, it is extremely difficult to leave it before concluding.
