## Extinctions in Near Time: Causes, Contexts, and Consequences (Hardback)

By -

Springer Science+Business Media, United States, 1999. Hardback. Condition: New. 1999 ed.. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Near time -an interval that spans the last 100,000 years or so of earth history-qualifies as a remarkable period for many reasons. From an anthropocentric point of view, the out-standing feature of near time is the fact that the evolution, cultural diversification, and glob- al spread of Homo sapiens have all occurred within it. From a wider biological perspective, however, the hallmark of near time is better conceived of as being one of enduring, repeat- ed loss. The point is important. Despite the sense of uniqueness implicit in phrases like the biodiversity crisis, meant to convey the notion that the present bout of extinctions is by far the worst endured in recent times, substantial losses have occurred throughout near time. In the majority of cases, these losses occurred when, and only when, people began to ex- pand across areas that had never before experienced their presence. Although the explana- tion for these correlations in time and space may seem obvious, it is...
