This publication may be worth purchasing. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.

And Taiwan was not the only place giving them this message. Thus began a remarkable two-year journey to reassess the conventional wisdom that the US and Europe are yesterday's story and to determine whether there is something profound that is happening that points the way to the creation of the next economy. Take Akron, Ohio, whose economy for decades was dependent on industries such as tire manufacturing, a product now made cheaply elsewhere. In Akron and other such communities, a combination of forces—including visionary thinkers, government initiatives, start-ups making real products, and even big corporations—have succeeded in creating what van Agtmael and Bakker call a "brainbelt." These "brainbelts" depend on a collaborative style of working that is unique to the societies and culture of America and Europe, since they involve levels of trust and freedom of...
