THE CARBONIFEROUS CULM BASINS OF MOROCCAN MESETA

The Carboniferous Culm Basins of Moroccan Meseta

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The sedimentology, biostratigraphy, and sequence stratigraphy of the Early Carboniferous turbiditic basins of Moroccan Meseta are described in this book. After numerous lithologic and paleontologic investigations, a precise biostratigraphic scale was built, especially by foraminifers for Morocco to date limestones in platform, but also turbidites because carbonate and detrital sediments are mixed in platform and basin. Four marine basins more or less connected together, existed in this period: Sidi Bettach near Rabat,...
