

Optometry Applied Optics [Paperback]

Filesize: 7.73 MB

Reviews

An exceptional book and also the font utilized was intriguing to read. This is for all who statte there was not a worth reading. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Prof. Tyson Hilpert)

OPTOMETRY APPLIED OPTICS [PAPERBACK]

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback Pages Number: 260 Publisher: Zhengzhou University Press; 1st edition (September 9, 2011). Contents: Module geometrical optics project a geometrical optics law and the principle of task light features. light. light three fundamental laws of the basic concepts of tasks. light intensity and spectral task of geometrical optics and the basic principles of the law of rectilinear propagation of light. independent of light propagation law. the law of reflection of light and the law of refraction 4. the optical path reversibility principle five Huygens 'principle task of natural phenomena. the wave of the geometric description of two. three of the Huygens' principle. the improvement of the Fresnel Huygens 'principle Huygens' principle of application tasks in five Fei Ma principle. optical process application of Fermat's principle Fermat's principle project two geometric optical imaging tasks of a plane mirror imaging task spherical mirror imaging one spherical mirror structure of two nearly spherical reflector axis imaging tasks a single interface an aperture diaphragm of the diaphragm and its role in the task of effectively mirror the degree three. thick lens refraction imaging tasks lens imaging a thin lens imaging. lens imaging task five ideal optical system imaging projects and pupil one aperture two light pupil three main light. the task of relative aperture field of view diaphragm and windows and. depending on the field diaphragm. windows. depending on the metric. vignetting task depth of field depth of focus of a. depth of field. depth of focus three four. the formula of the pupil center as the reference point of the imaging. depth of field formula five formula six of the depth of focus. an aberration of the telecentric optical path project aberration task..
