

## Gases in Metals, Vol. 2: The Determination of Oxygen and Hydrogen in Metals by Fusion in Vacuum (Classic Reprint) (Paperback)

Filesize: 8.55 MB

### **Reviews**

*A brand new e book with an all new point of view. I have got read and i am sure that i am going to likely to read through once more once more in the future. It is extremely difficult to leave it before concluding, once you begin to read the book.*  
*(Ms. Teagan Osinski III)*

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Gases in Metals, Vol. 2: The Determination of Oxygen and Hydrogen in Metals by Fusion in Vacuum The presence of oxygen, hydrogen, and nitrogen in small amounts in most commercial metals is well known. There are many instances of differences in quality of both ferrous and nonferrous metals where the causes apparently are not differences in the mechanical or thermal treatment of the material or variations in the chemical composition judged on the basis of the elements usually reported in chemical analyses. In such cases it is often felt that differences in the gas content of the material are of significance. The term gas used in this manner indicates those substances found in metals in either combined or uncombined condition which, in their ordinary free state, exist as gases. The expression thus includes oxides, hydrides, and nitrides in metals as well as uncombined oxygen, nitrogen, hydrogen, or other gases. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
