

Learning and Intelligent Optimization: Designing, Implementing and Analyzing Effective Heuristics

Filesize: 2.69 MB

Reviews

Complete information! Its this kind of good study. This really is for all those who statte that there was not a well worth looking at. I found out this pdf from my dad and i encouraged this ebook to learn.
(Candida Deckow III)

LEARNING AND INTELLIGENT OPTIMIZATION: DESIGNING, IMPLEMENTING AND ANALYZING EFFECTIVE HEURISTICS

Condition: New. Publisher/Verlag: Springer, Berlin | Third International Conference, LION 2009 III, Trento, Italy, January 14-18, 2009. Selected Papers | LION 3, the Third International Conference on Learning and Intelligent Optimization, was held during January 14-18 in Trento, Italy. The LION series of conferences provides a platform for researchers who are interested in the intersection of efficient optimization techniques and learning. It is aimed at exploring the boundaries and uncharted territories between machine learning, artificial intelligence, mathematical programming and algorithms for hard optimization problems. The considerable interest in the topics covered by LION was reflected by the overwhelming number of 86 submissions, which almost doubled the 48 submissions received for LION's second edition in December 2007. As in the first two editions, the submissions to LION 3 could be in three formats: (a) original novel and unpublished work for publication in the post-conference proceedings, (b) extended abstracts of work-in-progress or a position statement, and (c) recently submitted or published journal articles for oral presentations. The 86 submissions received include 72, ten, and four articles for categories (a), (b), and (c), respectively. | Evolutionary Dynamics of Extremal Optimization.- Evolutionary Dynamics of Extremal Optimization.- A Variable Neighborhood Descent Search Algorithm for Delay-Constrained Least-Cost Multicast Routing.- Expeditive Extensions of Evolutionary Bayesian Probabilistic Neural Networks.- New Bounds on the Clique Number of Graphs Based on Spectral Hypergraph Theory.- Beam-ACO Based on Stochastic Sampling: A Case Study on the TSP with Time Windows.- Flexible Stochastic Local Search for Haplotype Inference.- A Knowledge Discovery Approach to Understanding Relationships between Scheduling Problem Structure and Heuristic Performance.- Fitness Landscape Analysis for the Resource Constrained Project Scheduling Problem.- An ACO-Based Reactive Framework for Ant Colony Optimization: First Experiments on Constraint Satisfaction Problems.- Selection of Heuristics for the Job-Shop Scheduling Problem Based on the Prediction of Gaps...
