

Hever Hi-Speed Electric Vehicle Elevated Roadway

By Paul Bock

Createspace, United States, 2010. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Imagine traveling in your own car or truck at 400 mph with the vehicle's motor turned off. You are taking a nap, reading a book, or watching TV. The HEVER system will transport you in your personal vehicle treating the vehicle as freight. It will use an Electromagnetic form of propulsion. Electromagnetic propulsion uses electro-magnets to levitate and hold vehicles in place from about a half inch to almost four inches above the plane on which the vehicles travel. Today's trains make intermediate stops at stations to pick up and drop off travelers and freight. Using vehicles on this new system means no intermediate loading and unloading of freight or your belongings. Your own automobile can travel nonstop from your home to your final destination. You won't have intermediate stops and you won't need to trust your personal luggage to any service; it will travel with you in your automobile from the start of your trip all the way to your destination. On long trips travelers can sleep, watch TV or play cards. This...

I just started out reading this ebook. It is really exciting through reading through time. Once you begin to read the book, it is extremely difficult to leave it before concluding.
