What if you could prevent the next great cyber attack? What if you knew about the next World War - an epic battle against states, governments, companies and individuals? Who's going to protect our networks and technology from cyber terrorists? This insider's guide to cyber security shows you how venture capital and startups are securing and protecting America from cyber criminals, cyber threats and the growing cyber attacks on small, medium and large Fortune 500 companies. In this book, venture capital expert and investor, Ross Blankenship, shows you who's on the most wanted cyber criminal list, what methods cyber hackers are using to attack networks, where these cyber attacks have taken place (Anthem, Target, Sony, and the United States Office of Personnel Management), when these attacks happened, and why we need to ensure our nation's cyber defenses are strong. Blankenship is an expert on cyber security, who has written frequently about the importance of building our nation's cyber defenses. You need to know which companies are actively fighting cyber criminals, including companies like Cisco, Oracle, Microsoft, IBM, Hewlett-Packard, and cyber...
